# High Efficiency Cyclone Pre-separation System

HEC8 with WNS 2220

HEC14 with DS2720

Is that filter clogged again!? If you've got fine powders and dust clogging your vacuum's filters and causing problems, you need Ruwac's High Efficiency Cyclone "HEC" pre-separation system. It's not just about saving time and money: the "HEC" system is proven efficient at removing 97% of fine dust and debris from the air stream, creating a safer environment for all. Engineered for high velocity vacuum systems, the expertly innovative cyclone lid is equipped with a rubberized interior to eliminate abrasion within the chamber. The "HEC" system is also available for central or custom vacuum systems and offers a multitude of accessories and collection container options to suit any application. Stop wasting time on maintenance and add a Ruwac High Efficiency Cyclone pre-separation system to your industrial vacuum.

## "HEC" System Includes:

- High Efficiency Cyclone
- Connector Hose
- 30 Gallon Drum Container
- H-Bracket Swivel Cart Connector
- Equalizer Kit for Plastic Bag Inserts
- Drum Caddy with Heavy Duty Casters
